

PROGRAMMING

...programming and master planning services for a new research development campus for TISTR...

In association with SFA of Atlanta, Design Concept Co., Ltd. provided programming and master planning services for a new research and development campus for the Thailand Institute of Scientific and Technological Research (TISTR), to include lab and workshop facilities for a bioscience department, industrial materials, research, engineering development, energy and environmental research department. Other research and development areas include Thai packaging center, Thai national document center, pilot plant, technological services and consultancy groups. The master plan will also include a central business administration building and common facilities for TISTR staff and guest and visiting researchers. Landscaping and site development will be an integral component in the overall master plan of this campus.
