

The design attempt for this nation-wide retail shop is to create a clean, fresh look following the new corporate identity concept.

Within the extremely low budget and very limited space, the simple material and bright color palette were integrated into the design for a series of open display shelves.

This 80 sq.m. prototype shop will be the standard for all prime locations both in Bangkok and other regions.

...the simple material and bright color palette were integrated into the design for a series of open-display shelf.
