

This 80 sq.m. apartment was designed for energetic young couples who don't mind living in a compact space. The interior was designed to maximize the use of space and natural light. Mirror walls and a light neutral color scheme were used throughout the project to create an illusion of a larger space. All millwork and furniture were done with white maple veneer, on solid teak floors. Also wheel-attached furniture was designed to enable maximum flexibility and efficiency of space.

The interior was designed to maximize the use of space and natural light.
